

Management

IN TODAY'S BUSINESS ENVIRONMENT FINANCIAL PRECISION IS A REQUIREMENT. USE OF ANALYTICAL REPORTING TOOLS HAS BECOME A CRITICAL SUCCESS FACTOR FOR INNOVATIVE INSURANCE OPERATIONS THAT MUST MEET STATE MANDATED REPORTING REQUIREMENTS AND WANT ON-DEMAND INFORMATION TO COMPETE IN TODAY'S MARKET.

iPartners offers an analytical reporting solution that is accurate, flexible and adaptable. The system supports:

- Views of cumulative data or provides the capability to segment it by various categories like geographic regions or date ranges.
- Consolidate data from across the entire enterprise without rekeying into excel spreadsheets.
- Improved accountability through more accessible information for every business unit.
- Immediate response capabilities for requests on up to date financial data by regulatory bodies, board members and shareholders.
- Manage the inevitable fluctuations in the insurance

Executive managers require analytics that will help them execute on overall business strategies. With iPartners solution they have the ability to analyze and report data quickly through an easy to use intuitive tool.

"It was very difficult in the past to measure performance objectives using our current systems - measuring financial data in support of operational information is a very different thing. We were asked to produce very comprehensive reports which we could not do before iPartners.."

*- Grace Pan, Vice President, Controller
Majestic Insurance*

- Instant access to premium, loss, surplus and other financial data.
- Monitor changes in direct written, net written, earned and collected premiums
- Track reserves and evaluate surplus
- Drill down to source data and view individual transactions.
- Support "Best Practice" environment through standardized formulas and algorithms that create accurate, reliable results.
- Empower the operations to take advantage of opportunities through early identification of market trends
- Using the systems integration feature with Excel, reports can automatically be prepared for outside parties who do not have direct access to the online system. This expedites the reporting process and allows the user to get information where it needs to be faster and in an easy to understand format for greater impact.
